Professional Summary

Frontend developer with nearly 5 years of experience building scalable applications and optimizing performance for high-impact enterprise platforms. Proficient in React.js, TypeScript, and JavaScript, I've contributed to systems serving 100K+ users, focusing on user experience and reusable component architecture. Proven ability to collaborate cross-functionally in Agile environments.

Work Experience

Software Engineer, Italent Applications Pvt Ltd
Hyderabad, India

April 2022 – Present

- Contributed to enterprise-scale frontend development using **React.js and TypeScript**, building robust and scalable user interfaces.
- Collaborated effectively in **cross-functional Agile teams**, actively participating in code reviews, pull requests, stand-ups, and sprint planning to ensure timely delivery.
- Supported deployment workflows** using Git, internal CI/CD tools, and manual deployment tools (e.g., FileZilla, mRemoteNG, Tomcat) to ensure seamless application delivery.

Associate Software Engineer, Kuncham Software Solutions Pvt Ltd.
Hyderabad, India

July 2019 – Feb 2021

- Built **responsive web UIs** using React.js, JavaScript, and Bootstrap in a small agile team, ensuring optimal user experience across devices.
- Delivered features for client-facing applications with a focus on **cross-device usability and performance**.
- Practiced **collaborative development** using Git and regular sprint planning, ensuring efficient project workflows.

Projects

- Developed UI modules using **React.js and TypeScript** for a large-scale internal enterprise knowledge platform used by **100K+ global users**, enhancing content publishing workflows, role-based access control, and content discoverability.
- Migrated legacy JSP features to **modern React architecture using Context API**, streamlining localization workflows and improving translation efficiency for multilingual content (e.g., Japanese to English).

- Built **developer-facing tools** for managing labels and taxonomies (keyword-based content categorization), **reducing manual tagging overhead and improving internal searchability** across teams.
- Contributed to an **e-commerce platform UI** using React.js, JavaScript, and Bootstrap, building homepage layouts and reusable components to improve **mobile responsiveness and user engagement**.
- Integrated frontend features with **RESTful APIs**, improving data flow and interactivity between UI and backend services.
- Managed deployments through both automated pipelines (triggered by Git repository updates) and manual processes using **FileZilla and mRemoteNG** for deploying **Maven-built WAR files to Tomcat servers**, ensuring smooth and consistent delivery across environments.

Education & Qualifications

Bachelor of Technology (B.Tech) – Electrical & Electronics Engineering
Vaagdevi Engineering College, JNTUH
Warangal, India | Aug 2014 – May 2018

Skills

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Design, Context API, React Hooks, Redux

Backend & Deployment: REST APIs, Maven (WAR), Tomcat, Internal CI/CD Tools

Tools & IDEs: VS Code, Eclipse, FileZilla, GitHub Desktop, mRemoteNG, Postman, Chrome DevTools

Version Control & Workflow: Git, GitHub, Bitbucket, Jira

Other: Performance Optimization, Code Splitting, React.memo, Component Reusability
